## KEY FEATURES

### DATA COLLECTION AND ANALYSIS

Using our proprietary bundling engine we create and convey bundle analysis, identifying trends and opportunities for payer, partner and provider prospects. We offer both real-time and monthly reporting.

### PROVIDER NETWORKS

We recruit "in-network" providers and/or utilize existing Remedy networks to support success. We enable provider care redesign and workflow coordination, as well as establish downstream performance networks.

### PREMIER TECHNOLOGY, EPISODE CONNECT™

Remedy's technology platform is designed to connect, educate and train provider partners on proprietary care redesign tools - all of which are incorporated into Episode Connect™.

### MANAGE AND SHARE RISK

Remedy manages risk through bundle selection coupled with quarterly reconciliation analysis and payment services, including claims adjudication and gainsharing payments.
